EUROROLL GmbH
Raiffeisenstraße 3
59368 Werne
Germany

Guide for Pallet retrieval

1. Clear the adjacent canal
2. Put on Personal Protection Equipment (PPE)
3. Use the mobile elevating work platform (MEWP)
4. Use the additional PPE to enter the flow storage
5. Insert tread pads
6. Proceed to obstructed pallet
7. Secure the obstructed pallet with the front blocking device
8. Secure the following pallet with the lateral blocking device
9. Clear the obstruction
10. Remove the front blocking device
12. Remove the lateral blocking device
12. Take the previous tread pads and go back to the MEWP

Easy Error analysis
and fault elimination

Accessibility secured by
